### Further notes

1. Figures for 2016 are preliminary.

2. In 2018, the Instituto Nacional de Estadística, Geografía e Informática (INEGI) published revised employment (jobs) data with significant revisions. Major changes are apparent for Agriculture, forestry and fishing (Divisions 01 to 03) where, for example, 2015 employment has been revised downwards from 7.1 million to 2.9 million jobs while Manufacturing employment (10 to 33) has increased from 4.3 million to 5.8 million jobs. Because of these changes previous estimates are not compatible with the latest published statistics.

## Further notes

Official (ONS) GFCF statistics show a significant spike in 2005 for ISIC rev. 4 Division 24 (Manufacture of basic metals) offset by a significant drop for Division 84 (Public administration) believed to be a consequence of the reclassification of British Nuclear Fuels Ltd from the public sector to the private sector. For analytical purposes, in STAN, 2005-2006 current price and deflators series for Divisions 24 and 84 were smoothed using "spline interpolation" techniques. Corresponding higher aggregates were adjusted accordingly.
